

## 1987 Jaguar XJS V12 coupe

### The Job

This car was bought as a solid, MOT'd runner from a XJS specialist who had done some welding to it. It needed finishing and respraying.

### The Challenge

XJS values are on the rise, making a restoration now viable. This car was the perfect base: low mileage, solid and the right colour and spec. We tidied up the welds and repairs, prepared the car for paint and arranged a respray. We refurbished the radiator and attended to detail electric issues.

### The Result

This car is regularly driven by XJS enthusiasts who praise its quality and driveability. The car did not need significant work but what we have done has been to a good standard and has made the car reliable on hire. It regularly covers several hundred miles a week.
