

1971 MGB GT

The Job

Cosmetic renovation of this generally solid chrome bumper car.

The Challenge

We bought this hire car for a TV project. Solid but slightly tatty around the edges, it needed a makeover, along the way sorting out various dents, scratches and localised rot. We resprayed the car in black metallic.

The Result

The car has been transformed from a car that looks good from a few metres away into one that shines from any distance & any angle. This makeover is a good example of the sort of standard we can achieve without huge expense. The total cost of the work was under £3,000.
