

## 1976 MGB roadster

### The Job

We bought this car as a running project in winter 2014. It had been restored on stage at the NEC Classic Car Show November 2013 then given away in a competition. The winner didn't want it. We bought it as a runner but it clearly needed work to finish.

### The Challenge

The car had been resprayed and converted to chrome but the engine was tired, the overdrive didn't work and the ride height still at rubber bumper level. We rebuilt the engine, fitted a replacement gearbox with working overdrive, lowered the car, sorted out various issues and fitted retro plates to finish the look.

### The Result

The car now looks the part and is reliable and popular on hire. The paintwork still needs sorted but we will do that over the winter of 2015/16. The priority has been to create a reliable, presentable and authentic looking chrome bumper car.
